

## Resource 1: Example information Architecture Diagrams

Writing an information architecture document for a website or online engagement project can help you to understand all of the components your site will require, and allow you to communicate this to others for their input.

Below are two information architecture diagrams for generic websites, one designed to provide information, another to facilitate discussion and consultation. The arrows indicate only the essential links between pages within the site, although of course other links could exist.

### Generic Information Website IA

## Discussion And Consultation Website IA
